User Guide

AC450 Wireless Nano USB Adapter
Archer T1U

Contents

About This Guide

This guide is a complement to Quick Installation Guide. The Quick Installation Guide instructs you on quick installation, and this guide provides the product overview and detailed instructions for each steps.

When using this guide, please notice that features of the adapter may vary slightly depending on the model and software version you have. All screenshots, images, parameters and descriptions documented in this guide are used for demonstration only.

Conventions

In this guide, the following conventions are used:

Convention	Description
Teal Italic	Hyperlinks are in teal italic. You can click to redirect to a website or a specific section.
Teal	Contents to be emphasized and texts on the web page are in teal, including the menus, items, buttons, etc.
▌Note:	Ignoring this type of note might result in a malfunction or damage to the device.
🏷 Tips:	Indicates important information that helps you make better use of your device.

More Info

- The latest software and utility can be found at Download Center at *http://www.tp-link.com/support*.

- The Quick Installation Guide (QIG) can be found where you find this guide or inside the package of the product.

- Specifications can be found on the product page at *http://www.tp-link.com*.

- Our Technical Support contact information can be found at the Contact Technical Support page at *http://www.tp-link.com/support*.

Chapter *1*

Get to Know About Your Adapter

This chapter introduces what the adapter can do and shows its appearance.

This chapter contains the following sections:

• *Product Overview*

• *LED Status*

1. 1.   Product Overview

TP-Link Wireless USB Adapter connects your computer to a Wi-Fi network for smooth HD video, voice streaming and online gaming.

• Blazing fast wireless data transmission rates of up to 433Mbps

• Small, unobtrusive design allows you to plug it in and forget it is even there

• Utilizes 802.11ac standard and is backward compatible with 802.11a/n

• Supports ad-hoc and infrastructure mode

• Supports 64/128 bit WEP, WPA-PSK/WPA2-PSK

• Supports Windows, Mac and Linux

1. 2.   LED Status

You can check the adapter's working status by following the LED Explanation table.

Status	Indication
Off	The driver has not been installed. The adapter's radio has been disabled.
Flashing Slowly	The driver has been installed but no data is being transmitted or received.
Flashing Quickly	Data is being transmitted or received.

🏷 Tips:
If the LED is off, try these troubleshooting tips:

1. Check if the adapter is recognized and enabled or not. Refer to *Troubleshooting-T2* for detailed instructions.
2. Remove and reinsert the adapter.
3. Reinstall the software, if necessary.

Chapter *2*

Connect to a Computer

This chapter introduces how to connect the adapter to your computer.

Before you start using your adapter, insert the adapter into a USB port on your computer directly.
After connecting your adapter to the computer, please follow the instructions in the appropriate chapter for your operating system: *Windows*, *Mac OS X*, *Linux*.

Chapter *3*

Windows

This chapter introduces how to install your adapter's driver, use your adapter to join a wireless network, and uninstall your adapter in a Windows system. The adapter is equipped with a Setup Wizard, which can guide you through the installation process.

This chapter includes the following sections:

- *Install Driver*
- *Join a Wireless Network*
- *Uninstall Driver*

3. 1.   Install Driver

1. Insert the resource CD into your CD drive and run the Autorun.exe from the pop-up Autoplay window.

    ⚑ **Note:**

    1. You can also download the driver from the product's Support page at **www.tp-link.com**.
    2. In some operating systems, the CD screen will pop up automatically. Otherwise, run the CD manually.
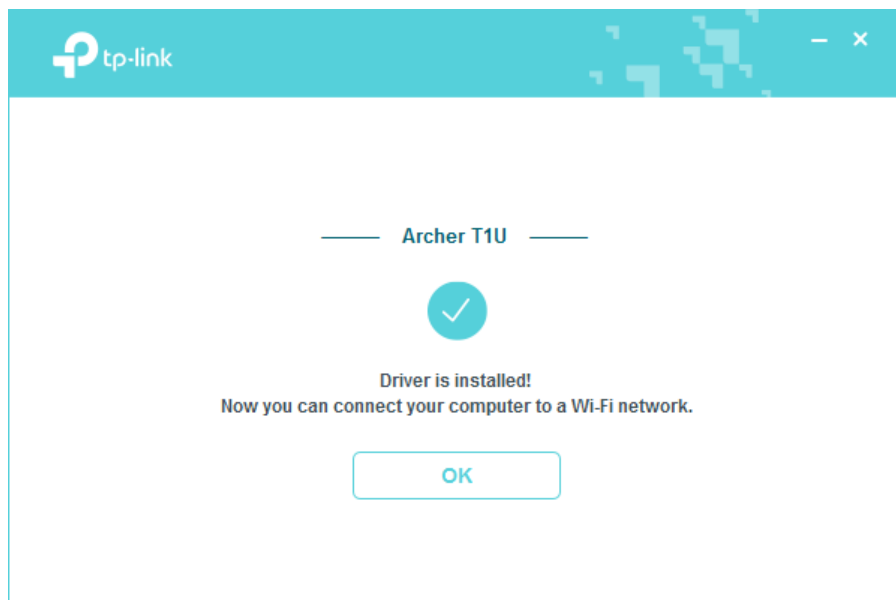

2. Select Archer T1U and follow the instructions to complete the installation.

    ⚑ **Note:**

    If you can't install the driver successfully, disable the antivirus software and firewall, then try again.
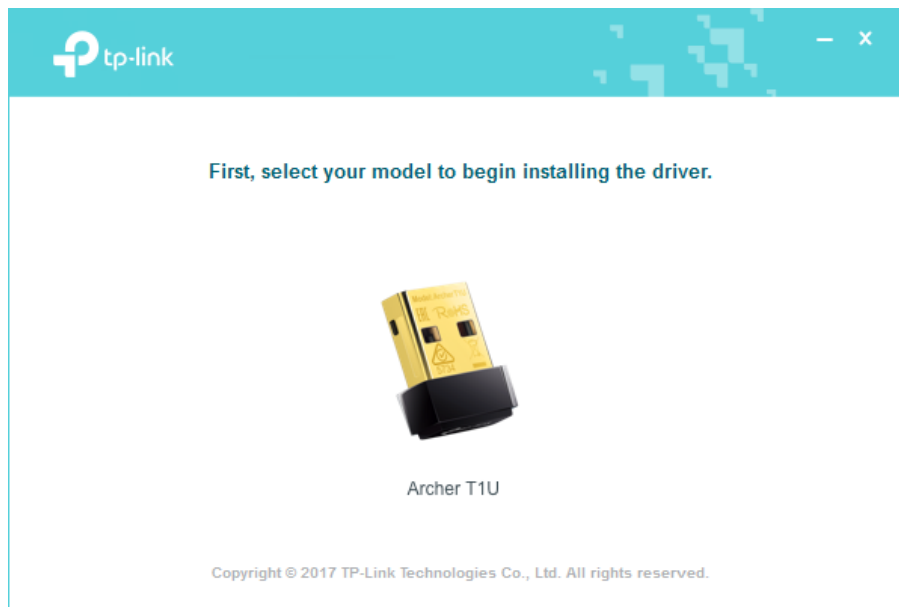

3. When the following screen appears, the driver has been installed successfully.

3. 2.   Join a Wireless Network

You can join a wireless network via Windows built-in wireless utility. Follow the instructions below to use your computer system's built-in wireless utility:

1. Click , or (Network icon) on the taskbar. Select the Wi-Fi network you want to join, and click Connect. Enter the network password when prompted.

2. When the network icon changes to or , it indicates a successful network connection.

3. 3.   Uninstall Driver

The software uninstallation steps vary a bit from different systems. Please follow the appropriate instructions for your Windows operating system: *Windows 8/8.1/10*, *Windows XP/7*.

• **Windows 8/8.1/10**

Go to Start menu to find the TP-Link application. Click Uninstall TP-Link Archer T1U Driver, then follow the on-screen instructions to complete the uninstallation.

• **Windows XP/7**

Go to Start > All Programs > TP-Link > Uninstall TP-Link Archer T1U Driver. Follow the on-screen instructions to complete the uninstallation.

Chapter *4*

Mac OS X

This chapter introduces how to install your adapter's driver and utility, use your adapter to join a wireless network, manage your adapter, and uninstall your adapter in Mac OS X.

This chapter includes the following sections:

- *Install Driver and Utility*
- *Join a Wireless Network*
- *Management*
- *Uninstall Driver and Utility*
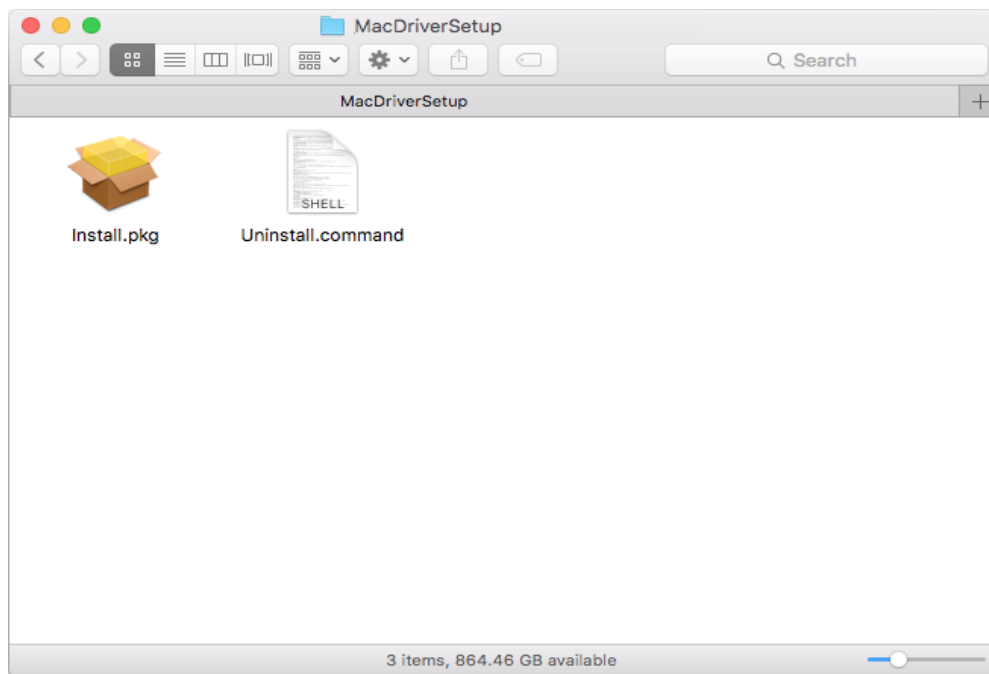

4. 1.   Install Driver and Utility

We take the steps in Mac OS X 10.10 as an example - the steps may vary slightly for other versions of Mac OS.

1. Download the driver and utility from this product's Support page from TP-Link's official website *www.tp-link.com*.
    ⚑ Note:

    The CD is included in the package. If your computer has a CD drive, you can also run the included CD to install

    the driver and utility.

2. Double click to unzip the downloaded folder and run the Install.pkg.

3. The Install TP-Link Wireless Utility Wizard window will appear. Click Continue and follow the wizard to continue the installation.

4. When the following screen appears, the driver and utility have been installed successfully. Click Restart to finish the installation.
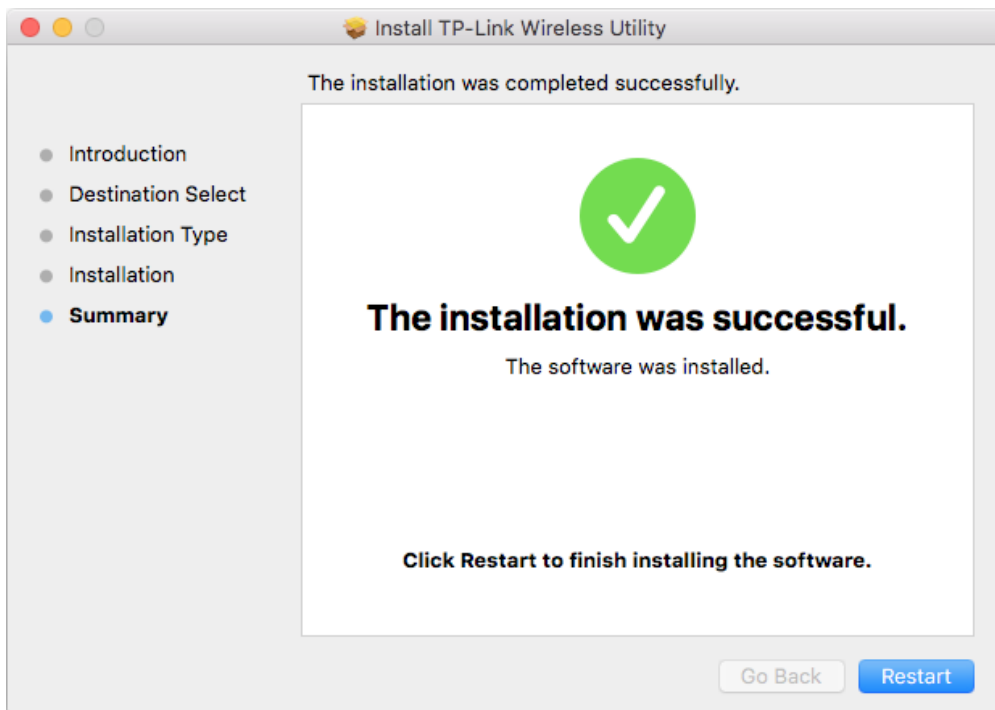

5. After restarting the computer, the TP-Link Utility icon will appear on the menu bar in the upper-right corner of the screen. To use the utility to join a Wi-Fi network with your adapter, refer to *Join a Wireless Network*.

> ⚑ **Note:**
> If the TP-Link Utility icon ![wifi icon] does not appear on the menu bar, make sure the USB wireless network adapter is connected properly and its LED is on.

4. 2.   Join a Wireless Network

There are two options of using the adapter to join a Wi-Fi network.

Option 1: *TP-Link Utility*

TP-Link Utility lets you easily connect the adapter to a Wi-Fi network and manage the adapter.

Option 2: *WPS (Wi-Fi Protected Setup)*

WPS (Wi-Fi Protected Setup) is a network security standard for easily adding computers and other devices to a home network. Use this method if your wireless router or access point supports WPS.

4. 2. 1.   TP-Link Utility

1. Open TP-Link Utility and select Site Survey tab. Then select the network you want to join from the list and click CONNECT.
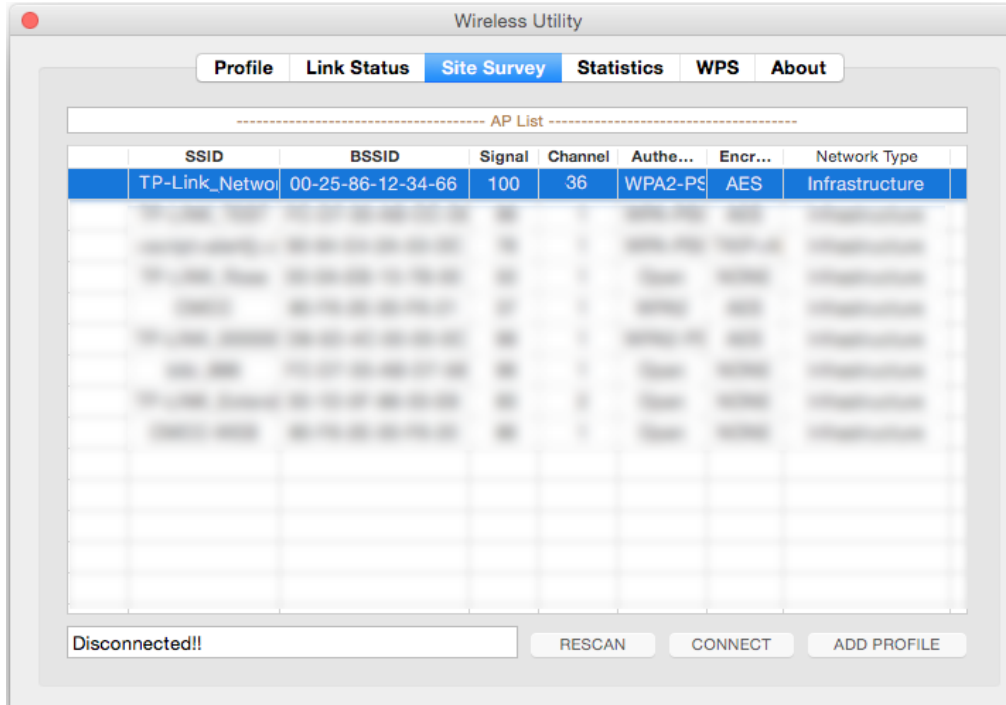

2. The Authentication\Encryption screen displays. If your network uses wireless security, you will be prompted to enter the Wi-Fi password of the network. Then click OK.
3. After successfully connecting to your network, you will see a symbol in front of your network's SSID, which indicates a successful connection.
4. 2. 2.   WPS (Wi-Fi Protected Setup)

WPS can be activated via PBC (Push Button Configuration) and PIN code. Please refer to *PBC* or *PIN* below.

• **PBC**

1. Press the WPS/QSS button on your router or AP.
2. Within 2 minutes, open TP-Link Utility and click WPS tab. Click PBC.
3. The following screen indicates a successful connection by WPS.
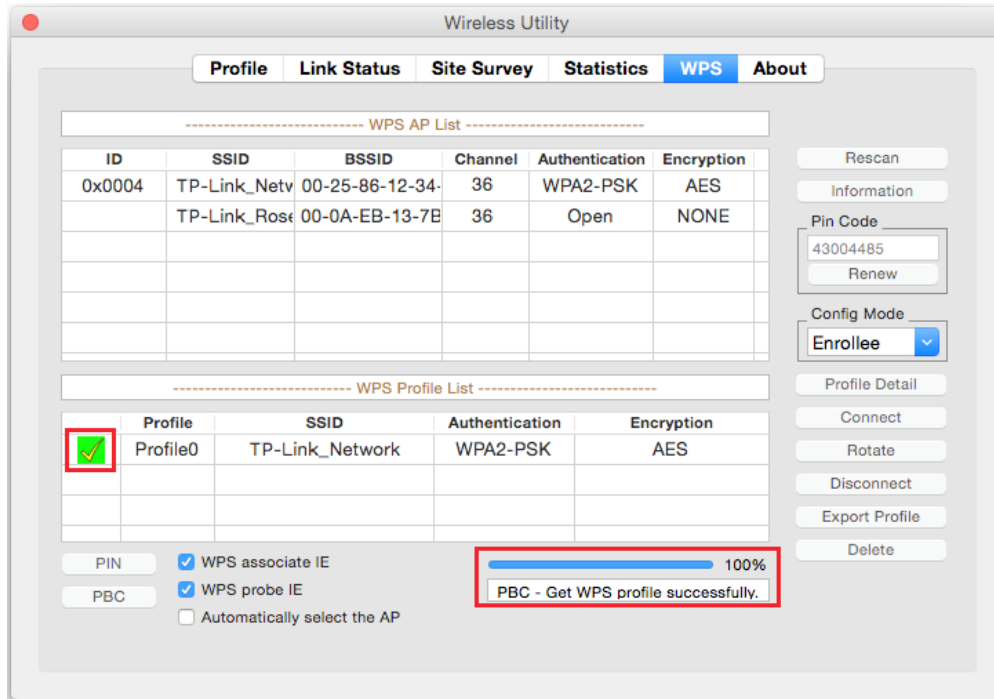

- **PIN**

1. Open TP-Link Utility and click WPS tab. Mark down the PIN displayed on the screen. Select the network you want to join from the WPS AP List and click PIN.
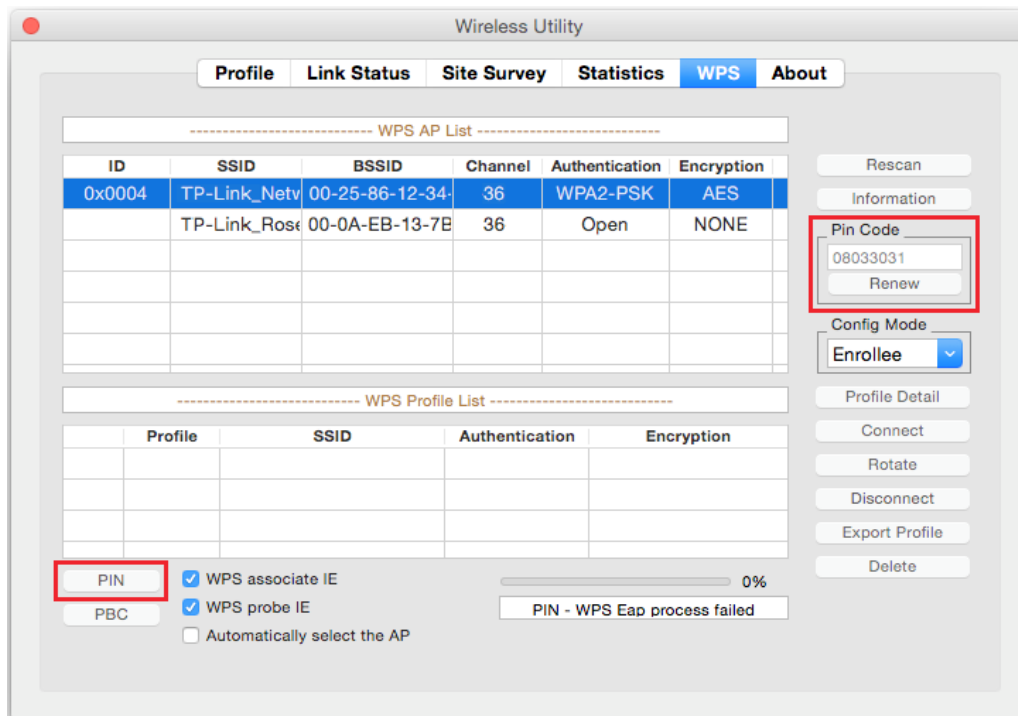

2. Within 2 minutes, log in to the web management page of your router or AP. Go to its WPS page, enter the PIN of the adapter in the corresponding field and click Connect.

3. The following screen indicates a successful connection by WPS.

4. 3.   Management

TP-Link Utility provides you with an easy way to manage various connection settings of your Wi-Fi network. It includes the following sections:

Link Status - View the information of the current Wi-Fi network connection and of the adapter.

Profile - Save or manage various Wi-Fi network connection settings.

About - View the utility version and the driver version of your adapter.

Open TP-Link Utility and click the Link Status or Profile tab to manage the corresponding section of your adapter.

4. 3. 1.   Link Status

You can view the current channel, the link quality and signal strength of the Wi-Fi network, and other information of the link status as shown in the following figure.

4. 3. 2.   Profile

The Profile screen let you save and manage different Wi-Fi network connection settings as profiles so that you can quickly and simply connect to your network. Moreover, you can join a hidden Wi-Fi network that does not broadcast its SSID by adding a profile, provided that you know its wireless settings, such as SSID, security type, and encryption type. For details, please refer to the instructions below: To add a new profile, To join a Wi-Fi network, and To manage an existing profile.

• **To add a new profile**

1. Click the ADD button, and then a new window will pop up.

2. Complete the settings as shown below, and click OK.
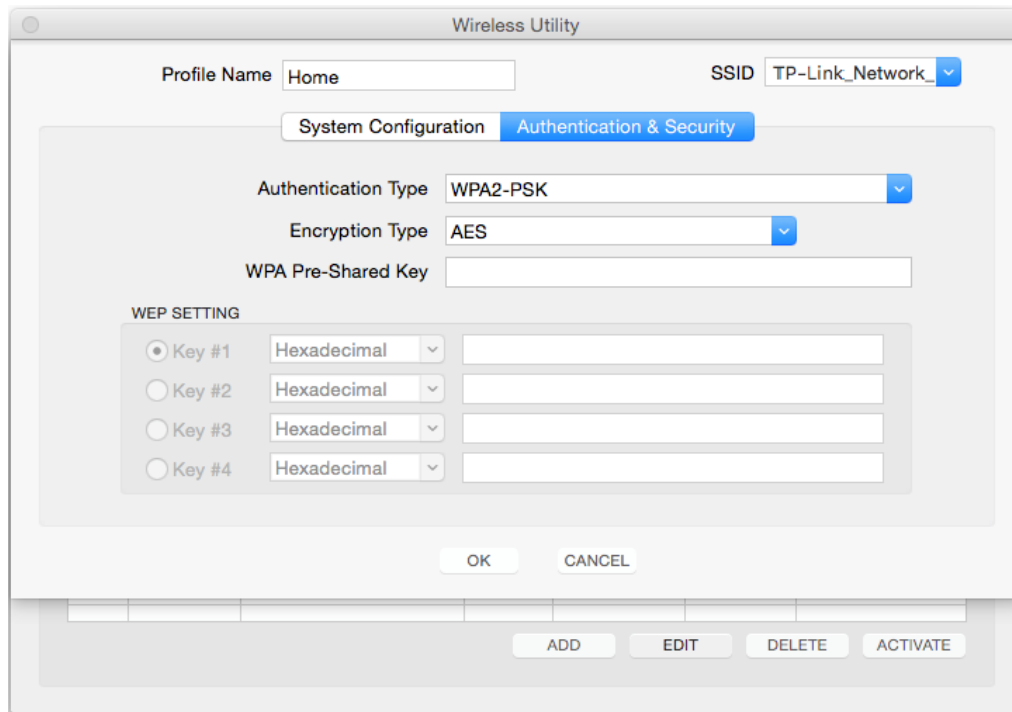

Profile Name - Enter a name for your profile, such as Home, Office, Coffee house. Do not enter the profile name that already exists.

SSID - Enter the name of your Wi-Fi network.

System Configuration:

Select CAM (Constantly Awake Mode) or Power Saving Mode depending on your preference. In Power Saving Mode, the adapter will automatically reduce its power consumption when not being used.

You can specify the Tx Power level to adjust the transmit power of the adapter. A lower level will reduce performance, but it decreases interference in the local network environment.

⚑ **Note:**
It is recommended to keep the default values for the settings of **RTS Threshold** and **Fragment Threshold**. Advanced users can make adjustments if necessary.

Authentication & Security:

Select or enter the corresponding wireless settings, including Authentication Type, Encryption Type and WPA Pre-Shared Key, which should be the same as those of your Wi-Fi network.

• **To join a Wi-Fi network**

If you want to join a Wi-Fi network that listed in the profile screen, select the profile and click the ACTIVATE button in the bottom corner.

• **To manage an existing profile**
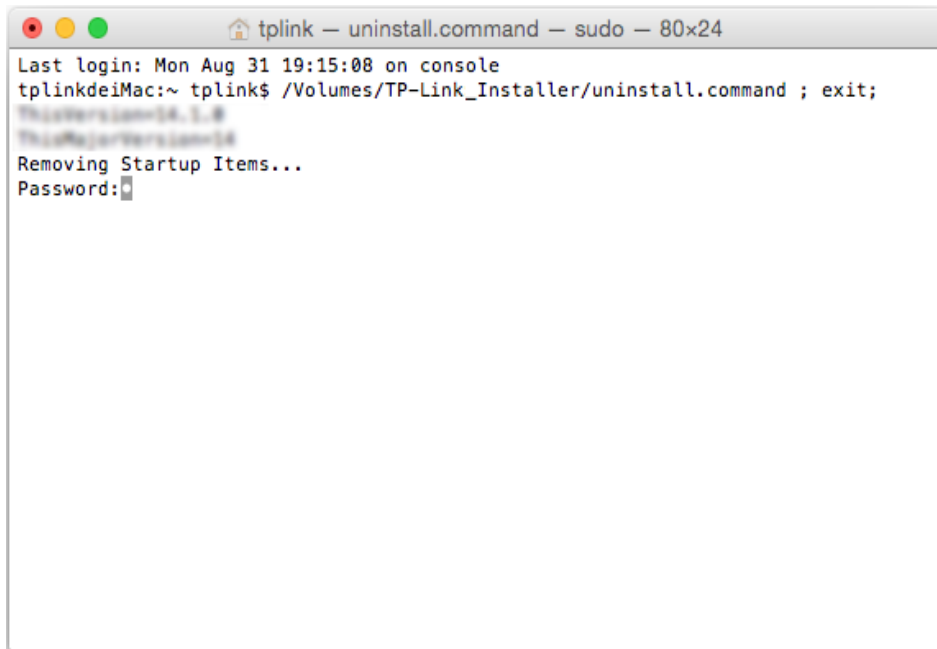

If you want to change the name or the wireless settings of an existing profile, select it and click the EDIT button in the profile screen, and then you can edit the settings of this profile. If you want to delete a profile that you no longer use, select it and click the DELETE button.

4. 4.   Uninstall Driver and Utility

1. Double click Uninstall.command in the downloaded folder.
2. A command window will pop up, please type the password of the root user to uninstall the software.

```
●  ●  ●                 ⌂ tplink — uninstall.command — sudo — 80×24

Last login: Mon Aug 31 19:15:08 on console

Chapter *5*

Linux

This chapter introduces how to install your adapter's driver in a Linux system.

Visit the TP-Link's website at *http://www.tp-link.com*, and go to Archer T1U's product page. Then find the compatible version of driver in the support page. Download and install the driver on your computer.

Appendix: Troubleshooting

T1. What should I do if the adapter is not detected?

- Make sure the adapter is securely connected to the computer.

- Make sure you meet the minimum system requirements for the adapter and that the latest Windows and system updates are installed on your computer.

- Make sure you use the latest driver for your specific adapter. The latest drivers can be found at the product's Support page at *http://www.tp-link.com*.

- Try a different USB port on the computer.

- Try restarting the computer or try using the adapter on a different computer.

T2. How to check if I have installed the driver for my adapter successfully or not?

1. On your computer, please right click Computer icon and go to Manage;
2. Open the Device Manager and go to Network adapters, and then find the corresponding TP-Link adapter, right click it and then go to Properties;
3. If you can see "This device is working properly." in the red box, you have already installed the driver successfully.
T3. What should I do if can't connect to the Wi-Fi after installing the driver?

- Refer to *T2* to check if you have installed the driver for your adapter successfully .
- Make sure the adapter is securely connected to the computer.
- Disable the antivirus software and firewall, then try again.
- Try a different USB port on the computer.
- Restart your computer and try again.

- Re-install the driver and try again.

T4. How to find the hardware version of the adapter?

- The hardware version is printed on the product label on the package or the adapter. There is a character string "Ver:X.Y" (for example, Ver:2.0) in the Serial Number field, and the number X is the hardware version of the adapter.

Model: Ver:2.0
S/N:XXXXXXXXXXXX

- Visit *http://www.tp-link.com/faq-46.html* and follow the second method to find the hardware version of the adapter.

COPYRIGHT & TRADEMARKS

FCC STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

1) This device may not cause harmful interference.

2) This device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.

FCC RF Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. End users must follow the specific operating instructions for satisfying RF exposure compliance. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This equipment has been SAR-evaluated for use in hand. SAR measurements are based on a 5mm spacing from the body and that compliance is achieved at that distance.

CE Mark Warning

 ϵ

This is a class B product. In a domestic environment, this product may cause radio interference, in which case the user may be required to take adequate measures.

OPERATING FREQUENCY (the maximum transmitted power)

5180MHz—5240MHz (23dBm)

5260MHz—5700MHz (20dBm)

EU declaration of conformity

TP-Link hereby declares that the device is in compliance with the essential requirements and other relevant provisions of directives 2014/53/EU and 2011/65/EU.

The original EU declaration of conformity may be found at *http://www.tp-link.com/en/ce*.

RF Exposure Information

This device meets the EU requirements (2014/53/EU Article 3.1a) on the limitation of exposure of the general public to electromagnetic fields by way of health protection.

This device has been tested and meets the ICNIRP exposure guidelines and the European Standard EN 62209-2. SAR is measured with this device at a separation of 0.5 cm to the body, while transmitting at the highest certified output power level in all frequency bands of this device. Carry this device at least 0.5 cm away from your body to ensure exposure levels remain at or below the as-tested levels.

Restricted to indoor use.

Canadian Compliance Statement

This device complies with Industry Canada license-exempt RSSs. Operation is subject to the following two conditions:

1) This device may not cause interference, and

2) This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de lic   ence. L'exploitation est autorisée aux deux conditions suivantes :

1) l'appareil ne doit pas produire de brouillage;

2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, meme si le brouillage est susceptible d'en compromettre le fonctionnement.

Caution:

1) The device for operation in the band 5150–5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems;

2) For devices with detachable antenna(s), the maximum antenna gain permitted for devices in the bands 5250-5350 MHz and 5470-5725 MHz shall be such that the equipment still complies with the e.i.r.p. limit;

3) For devices with detachable antenna(s), the maximum antenna gain permitted for devices in the band 5725-5850 MHz shall be such that the equipment still complies with the e.i.r.p. limits specified for point-to-point and non-point-to-point operation as appropriate; and

The high-power radars are allocated as primary users (i.e. priority users) of the bands 5250-5350 MHz and 5650-5850 MHz and that these radars could cause interference and/or damage to LE-LAN devices.

DFS (Dynamic Frequency Selection) products that operate in the bands 5250- 5350 MHz, 5470-5600MHz, and 5650-5725MHz.

Avertissement:

1) Le dispositif fonctionnant dans la bande 5150-5250 MHz est réservé uniquement pour une utilisation à l'intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux;

2) Le gain maximal d'antenne permis pour les dispositifs avec antenne(s) amovible(s) utilisant les bandes 5250-5350 MHz et 5470-5725 MHz doit se conformer à la limitation P.I.R.E.;

3) Le gain maximal d'antenne permis pour les dispositifs avec antenne(s) amovible(s) utilisant la bande 5725-5850 MHz doit se conformer à la limitation P.I.R.E spécifiée pour l'exploitation point à point et non point à point, selon le cas.

En outre, les utilisateurs devraient aussi être avisés que les utilisateurs de radars de haute puissance sont désignés utilisateurs principaux (c.-à-d., qu'ils ont la priorité) pour les bandes 5250-5350 MHz et 5650-5850 MHz et que ces radars pourraient causer du brouillage et/ou des dommages aux dispositifs LAN-EL.

Les produits utilisant la technique d'atténuation DFS (sélection dynamique des fréquences) sur les bandes 5250- 5350 MHz, 5470-5600MHz et 5650-5725MHz.

Radiation Exposure Statement:

This EUT is compliance with SAR for general population/uncontrolled exposure limits in RSS-102 and had been tested in accordance with the measurement methods and procedures specified in IEEE 1528 and IEC 62209. This equipment should be installed and operated with minimum distance 1.0 cm between the radiator and your body. This

device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

Déclaration d'exposition aux radiations:

Cet équipement est conforme aux limites d'exposition aux rayonnements IC établies pour un environnement non contrôlé. Cet équipement doit être installé et utilisé avec un minimum de 20 cm de distance entre la source de rayonnement et votre corps.

Industry Canada Statement

CAN ICES-3 (B)/NMB-3(B)

Korea Warning Statements

安全諮詢及注意事項

・請使用原裝電源供應器或只能按照本產品注明的電源類型使用本產品。

・清潔本產品之前請先拔掉電源線。請勿使用液體、噴霧清潔劑或濕布進行清潔。

・注意防潮，請勿將水或其他液體潑灑到本產品上。

・插槽與開口供通風使用，以確保本產品的操作可靠並防止過熱，請勿堵塞或覆蓋開口。

・請勿將本產品置放於靠近熱源的地方。除非有正常的通風，否則不可放在密閉位置中。

・請不要私自打開機殼，不要嘗試自行維修本產品，請由授權的專業人士進行此項工作。

Safety Information

- Keep the device away from water, fire, humidity or hot environments.
- Do not attempt to disassemble, repair, or modify the device.
- Do not use damaged charger or USB cable to charge the device.
- Do not use any other chargers than those recommended.
- Do not use the device where wireless devices are not allowed.
- This USB Adapter can be powered only by computers that comply with Limited Power Source(LPS).

Please read and follow the above safety information when operating the device. We cannot guarantee that no accidents or damage will occur due to improper use of the device. Please use this product with care and operate at your own risk.
